Technology will make a significant contribution to the exit of the coronavirus crisis. But to do so, there must be a comparison on how to use it, clear and inclusive political (and technological) decisions. It will be discussed in a public meeting on Monday 20 April organized by the parliamentary intergroup on artificial intelligence and in collaboration with Copernicans and Wired Italia. Below is the program of the event which will be streamed live here.

16

INTRODUCES

Alessandro Fusacchia, co-promoter of the Parliamentary Intergroup on Artificial Intelligence
